

REN-D

RUBBER NOZZLE WITH DAMPER

The REN-D is highly suitable for Plymovent's fixed extractors and exhaust hose reels.

Recommended for today's trucks, private cars and especially vehicles with twin exhaust pipes. The REN-D is designed to take in ambient cooling air thereby reducing the exhaust emission temperature.

The nozzle is composed of moulded, high temperature resistant rubber. REN-D is also equipped with a manual on and off damper for flow control.

The nozzle includes a CO-outlet for measuring emission values.

SPECIFICATIONS

■ Physical dimensions and properties

Material	rubber
Colour	black
